Vacworks Manual Installation

The installation must be performed by someone with administrative rights. The steps are as follows:

1. Unzip the provided zip file and copy the folder "Graham" to the root of your C: drive. (Should have a folder: C:\Graham)
2. Using the "run as administrator" option, open a command prompt.
3. Using the command prompt, change to the directory: C:\graham\VWII. (type: cd C:\Graham\VWII)
4. Type RegisterOCX.bat and hit enter. You should get a series of seven messages similar to the one shown here. Hit OK for each.
5. Try running "Vacworks.exe" located in the C:\Graham\VWII folder.
